Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The instant claims 1-18 are allowable over the prior art of record. The prior art of record does not fairly teach or suggest to one of ordinary skill in the art to prepare the material of claim 1 wherein the black and white thermographic material comprises ONE layer containing each of a cyan dye-forming couple, a magenta dye-forming coupler, and a yellow dye-forming coupler. Conventional materials comprise each of these couplers in a separate layer on a substrate (Shuto et al (5,266,448, column 14)). Additionally, benzoquinone compounds are known as additives in bleaching solutions for the in silver halide photographic materials (Shuto et al (5,266,448, column 9, line 68)) and as anti-stain agents that are added to either a yellow dye-containing layer (which is furthest from the support) or in an adjacent filter layer to decrease color fog in silver halide color light sensitive photographic materials which contains reducible silver ions to form an image which the instant invention is substantially free of (Kikuchi et al (4,277,558)). The compounds are also known as photoacid generators in photoresist compositions (Dessauer et al (5,858,583)). They are known compounds in other materials as well (Goldman et al 3,515,568, Crevling et al 2,899,334, and Armour et al 4,485,164 and 4,409,315). Thus, while the compounds are known, there is no teaching or suggestion to add them to a layer of a black and white silver-free thermographic material containing all three dye-forming couplers, even if such a layer was known in the art. Therefore, the instant claims are now allowable over the prior art of record.
